

Indoor Fixed Network Camera

Introduction

VideoMate IP50 series provides an easy-to-install way for the indoor fixed camera solution. Combined with the MPEG-4 video compression format, superior performance and high video quality are achieved with much smaller recording file size, which means much lower costs for data storage. Wireless version, IP50W, is also in the lineup. The VideoMate IP50 series also comes equipped with built-in speaker, microphone, smart motion detection, and additional I/O controls.
