The magic of mobile surfing

Reliance Netconnect Data and Voice Card

Now you don't need to frantically search for a cyber café while on tour. Reliance Netconnect gives you the freedom of mobile surfing anywhere in the country. Slip the Reliance Netconnect Data & Voice Card into your laptop and you're ready to go. This pocket-size wonder packs quite a punch — it works both as a modem and a mobile phone, so you can surf at high speeds as well as make and receive calls and SMSes from your laptop.

Reliance's cutting edge CDMA2000 1X technology offers pan-India coverage, giving you wireless Internet access even from the remotest part of the country. Experience it all at a cost that's incredibly affordable.

Reliance Netconnect Key Benefits:

Working while you travel has never been this simple. Reliance Netconnect offers you benefits that make it easy to connect to work or catch up with friends, no matter where you go.

- **Coverage**

Surf seamlessly in over 2,200 towns across India (soon to be increased to 5,700).

- **Speed**

Access files and download information at speeds up to 144kbps

- **Emails**

Stay in touch by accessing mail while you're on the move.

- **Calls**

Make and receive calls to any number in the world from your laptop.

- **SMS**

Send and receive SMS messages from your laptop. Even multiple SMS is possible.

- **Address Book**

Synchronise your address book with Outlook Express.

- **Convenience**

Say goodbye to bothersome copper wires and the problem of dial-up connections like timeouts, blackouts and frequent disconnections.

- **Easy to Install**

Follow simple instructions after installing the software from the CD provided to you.

- **Unlimited Internet Surfing**

Stay online always at just Rs 650 per month (up to 1 GB data transfer) without bothering about running up huge phone bills.

Internet on the move

Need to access the Internet when you are travelling? Reliance Netconnect offers uninterrupted, anytime, anywhere wireless Internet connectivity, in over 4,500 towns, 3 lakh villages and along major highways and railway routes in India.

Reliance's cutting edge CDMA 1 x network can give you high-speed Internet access, at speeds up to 144kbps without tying you down to a landline. A suite of Reliance wireless products like mobile phones, fixed wireless phones and data cards can all be used as wireless modems to connect to the Internet from PCs, laptops and other handheld devices.

If you want to access the Internet on the move, you have to BUY IT.

Features -

- Uninterrupted high-speed wireless Internet connectivity, even in remote locations, all over the country.
- Better surfing speeds, with download speeds up to 144 kbps.
- One-time installation of the dial-up software enables the user to access the Internet anywhere on the Reliance Mobile phone network, without the need to change the dial-up configuration.
- Hassle-free connection
 - Connect instantly (No line busy / waiting tone)
 - Easy to remember username / password (your phone / card number)
- Enables a user to surf the Internet from any location – your bedroom, drawing room, hotel room, office or even while on the move in a car, train or bus.

- o To subscribe to the Reliance data card, customer needs to submit documents as per TRAI guidelines
 - o Proof of identity (passport, driving license, pan card, Voter ID Card, Photo Identity card issued by any Institution.)
 - o Proof of address (Electricity bill/Telephone bill, insurance receipt, Ration Card, Credit Card/Bank Statement, Employer's Certificate, Lease Agreement etc.)
 - o 2 photographs.
-
