Through innovative, reliable products and services; motivated and talented staff; responsible approach to the business; and collaboration with business partners and customers, Compro Technology is bring in an exciting new digital lifestyle to make the world a better and safer place to live in imaginative new direction.

Compro Mission

Our Mission is to creative digital multimedia products that enrich your lives.

History

Compro Technology is the worldwide leader in developing and manufacturing PC based TV tuners and data broadcast receiver product since 2003. Compro's product allows users to watch television on their PC and create both still video images and digital video recordings. There is a worldwide shift from analog to digital TV. In a few years, analog TV broadcasts will be completely replaced by digital TV broadcasts, and PC based TV tuners such as the MediaMate can take advantage of the benefits of digital TV broadcasts: better pictures and clearer sound. In 2008, Compor Technology introduced flagship products in the world of the PC-TV; E850 and E900 which offer the best functionality and performance to address the needs of transitioning from the analog TV to digital TV receivers with dual tuners capability. In the year 2009, Compro Technology will continuous to its commitment to the VidoeMate products line to continuous to release better and ease-to-use S/W and more versatile H/W to offer full range of the PC to TV multimedia entertainment.

Aside the continuous enhancement and development of the new PC-TV products, Compro Technology is launching two new product lines to the product portfolio this year; Network Media Center and IP Security.

The Network Media Center provides endless home entertainment with unique multimedia server. It features a Full HD 1080P MPEG1/2/4/H.264 player with SATA disc interface upgradable to 1TB hard-disc that can store up to 250 hrs of video, 80,000 songs or 40,000 digital photos. The HD contents are available via a build-in network interface, DVB-T tuner, and local SATA hard-disc. It is the ultimate media organization solution to offer HD contents at your living room TV set without the Computer.

The IP Security products line offer full range of the intelligent network-based cameras with an intelligent profession grade content management software solution (CMS). These camera solutions provide maximum customer value through effective surveillance solutions, reduced costs and increase flexibility and performance to allow customers to manage the security anytime, anywhere, and anyplace with either a PC or 3GPP cell phone
